

VIRTUAL CYCLE AROUND THE WORLD 2023

JUNE 7 - 21

JOIN US! It is approximately 25,000 miles to travel around the world and Children's Medical Research Foundation (CMRF Inc.) are seeking volunteers across the globe this June to get on their bikes for the **4th Annual Virtual Cycle Around the World** to collectively reach this target and raise funds for world-class pediatric research.

You don't need to set up a big event or get a crowd together, as there are so many ways you can raise vital funds solo, at home or by taking on a DIY challenge. You can set a personal goal to cycle a specific distance and ask your friends and family to sponsor your efforts! Get inventive and rally your community to give but do it your own way! Contact us to find out more.

Your efforts will help to support world-leading scientists who are dedicated to improving the lives of sick children, not only in Ireland but having a global impact. Because of generous individuals like you, we can better understand some of the most serious illnesses facing children today, so they can be diagnosed quickly and treated with kinder and more efficient methods.

Together we can do #WhateverItTakes

CMRF INC. BY THE NUMBERS:

Over 34 grants issued since 1979

Over \$10M raised for research

Collaborations with 16 US Institutions

CMRF supports pediatric research in Ireland and the US, transcending borders and impacting children globally

**Children's
Medical
Research
Foundation**

CMRF's Virtual Cycle has raised nearly \$400,000 since 2020.
